i. OPERATING INSTRUCTIONS

The Adapter P/N: 01060001, by design has no independent operating instructions. Being a digital to discrete adapter, operating instructions for the systems interfaced will need to be followed.

ii. EQUIPMENT LIMITATIONS

The Adapter P/N: 01060001, is limited to the conversion of the ARINC-429 Input (Label 260), into a maximum of 9 discrete relay outputs. Providing both the ARM and Contact of the relay to allow the installing agency maximum versatility.

The Adapter P/N: 01060001, is limited by the on board systems providing the digital input and the design requirements of the interconnecting systems. As such the check out procedures of the interfacing systems will need to be followed for system verification.

The design of the Adapter P/N: 01060001, is such as to cause minimal degradation of the input signal and to convert the data in the fastest and most accurate means possible.

iii. INSTALLATION PROCEDURES

1. INTRODUCTION

This section contains information relative to the installation of the Adapter to assure satisfactory performance of the unit. (See Sections "iv" and "v" for detailed mechanical and wiring diagrams.)

2. UNPACKING AND INSPECTING EQUIPMENT

After unpacking the unit, make a visual inspection of the unit for evidence of damage incurred during shipment. If claim for damage is to be made, save the shipping container to substantiate the claim.

3. PREINSTALLATION CHECK

Perform a continuity and power check on the wiring harness before connecting equipment.

4. POWER REQUIREMENTS

The Adapter operates from a standard 27.5 VDC aircraft power source, Provide circuit protection with an in line 1 AMP breaker on the 27.5 VDC

5. POST INSTALLATION CHECK

There is no in-aircraft adjustment required for the Adapter. All alignment and adjustment procedures are accomplished during bench maintenance.

6. PREFLIGHT CHECK

Follow the manufactures check out procedures of the on board systems, to determine indications being driven by the Adapter are accurate.

iv. INSTALLATION MECHANICAL DIAGRAMS

The Adapter is designed for flat mounting anywhere on board the aircraft, pressurized or unpressurized compartments. The unit has four (4) mounting holes for number (6) size screws. (NOTE: Screws and other miscellaneous mounting hardware are NOT included.)
